## S-Fence<sup>™</sup> - R

**S-Fence with Low-Light Reflector**

S-Fence is a patented, high performance, low total cost and Zero Waste sediment control system for construction sites. S-Fence is an alternative to silt fence. Unlike traditional silt fence, S-Fence lets water flow through, which reduces the maintenance problems caused by typical silt fence ponding. Because it will not decay or slump, S-Fence continues to perform

at a high level for years. Reflector material can be added as an option for better visibility in low-light situations (-R). Conspicuity safety markings are made from highly reflective micro-prismatic materials and are used to increase visibility in several applications. Reflectors are DOT-C2 certified and exceed NHTSA requirements.

|   |                            |
|---|----------------------------|
| Dimensions: Each 7 foot S-Fence panel is fitted with a 2"x4" reflector folded over the top so that a 0.75"x4" reflector facing is visible on each side of each panel. | Thickness: 0.2 millimeters |
| Reflector Part Number: 3M S-6736  | Non-corrosive              |
| Life: UV stabilized. DOT C2 Certified. Meets NHTSA's min spec of 250 candle power for 7 years.  | Edge Sealed                |
| Weather resistant. Life Rating - Outdoors (7 years)   | Adhesive: Acrylic          |
